

DanLyn Studios has several things going for it; a gorgeous large mainroom that has been professionally tuned for a very musically sounding environment. The control room is also tuned and very comfortable to work in for long periods. Located only 25 minutes east from downtown Edmonton the studio sits on 3.25 acres with an outdoor view from the mainroom through large picture windows making this a unique comfortable and aesthetically pleasing place to be. First class gear from the recording equipment and mics to the Model 225 Bosendorfer grand piano, B3/122 Hammond organ and the in house Yamaha drums and assorted percussion. Come see for yourself, or simply call for a friendly chat.
